Ad-hoc Network Connection for Windows 7

1. Open the Window Explorer

2. Click the “Set up a new connection or network”
3. Click the “Set up a wireless ad hoc (computer-to-computer) network”

4. Click the next button.
5. Input the Network Name (ex, HelloPT) and Select the Security type “No authentication (Open)” and Click the next button.

6. Complete the “set up an ad hoc Network”.

The HelloPT network is ready to use

This network will appear in the list of wireless networks and will stay active until everyone disconnects from it. Give the network name and security key (if any) to people you want to connect to this network.

Wireless network name: HelloPT
Network security key: unsecured

To share files, open Network and Sharing Center in Control Panel and turn on file sharing.

Recommended options:

Enable Internet connection sharing

Share an Internet connection on an ad hoc network
7. Connect to ad hoc server on iPhone

Known networks will be joined automatically. If no known networks are available, you will be asked before joining a new network.
8. Waiting until iPhone be the active on ad hoc network.
9. Execute Server Program (HelloPT 1.4.0.2)

10. Select the PPT file.
11. Execute HelloPT Client for iPhone. And connect the server. Finally, ready for presentation.
